About Me

Currently, I am a college student at SRM University, but I have started exploring the world of UI/UX design. Right now, my focus is pretty much on laying down foundational skill sets-from understanding core design principles to exploring aspects of user-centered approaches in design. My passion in learning constantly drives me in search for new techniques and tools with insights in technology and design. I truly enjoy trying out and work on different creative projects so that I get hands-on learning in these fields.

Education

Guru Harkrishan Public School | Delhi, New Delhi
Science Stream | 05/2023

- Consistently ranked in the top 10% of my class.
